

Serial No. 09/750,921
Amdt. dated August 27, 2004
Reply to Office Action dated June 4, 2004

Docket No. P-0170

Amendments to the Specification

Please replace the paragraph beginning at line 8 on page 1 with the following new paragraph:

A Wireless Application Protocol (WAP) is a communication protocol for effectively using contents, such as the internet, from a wireless terminal, such as a mobile telephone. The [[a]] WAP is a standard protocol for executing value-added communication services by using a mobile communication network by a mobile communication service provider, information provider, and terminal manufacturer, and was established by Erickson, Motorola, Nokia, Unwire Planet, etc. in June, 1997.

Please replace the paragraph beginning at line 10 on page 9 with the following new paragraph:

Therefore, the Handshake process in the SSLS protocol is successfully ~~complete~~ completed, and the data in the application layer is encrypted to thus be transmitted/received in d2.
